

Why The Leg Tanner?

The Leg Tanner was created to solve an age old problem for tanning clients and tanning salon owners alike. Why can't tanning clients get a good tan on their legs?

3 main reasons:

1. The diagram below illustrates how tanning beds concentrate approximately 25-30% more energy in the center of the unit causing the stomach to be the darkest part of the body.
2. Skin on the legs is much tougher and therefore more difficult to tan, even if the power levels were even.
3. Shaving legs causes increased exfoliation of the skin losing what little tan that was achieved.

The Leg Tanner is the solution to this pesky problem while giving your salon a unique advantage.

Your client will love these great features:

- Comfortable contoured acrylics
- Powerful tanning action - session time 12 min.
- Tans around the entire leg

The small footprint of The Leg Tanner as well as the fact that it is on wheels for easy maneuverability means that you can place the Leg Tanner nearly anywhere in your salon... Even in the lobby, where the alternating LED glamour lights are sure to attract attention and interest.

The stylish and sleek design is something you won't want to hide away in a backroom. The Leg Tanner should be a show-stopper that attracts clients to enjoy the 12 minute tanning session. The 32 lamps with patented W.A.L.T.S.™ (Wrap Around Leg Tanning System) results in a perfect bronze tan each session. Even the inner legs will get a rich, dark bronze tan. The contoured acrylics make the tanning session comfortable; clients sit back and relax in a chair while reading their favorite magazine. The Leg Tanner runs quietly so the entire experience is designed around total relaxation.

T-Max compatible and easy to clean, The Leg Tanner is a snap for salon personnel to operate and maintain. Your staff will find that booking sessions on The Leg Tanner will be as easy as 1-2-3 and you'll be on your way to increased revenue opportunities. So make life easier for you and your clients with The Leg Tanner. In no time, you'll realize it was the missing puzzle piece in your business.

Never before has there been a entry level tanning bed that can earn you a \$1.00 per minute !

- Attracts new customers
- New equipment adds excitement
- New revenue source
- Great return on investment performance

Testimonials:

"Since the first week we installed The Leg Tanner, we have been booked non-stop. We are charging \$12.00 per session at 25 to 30 sessions a day. It's incredible." - Dana Pierce, Turbo Tan

"I purchased the original leg tanner from Classic Legs in 2002. Since then, I have had a huge success in getting my client's legs tanned! The Leg Tanner has been a huge profit center and is consistently booked all spring and summer long. My clients absolutely cannot live without it and it is one of their favorite tanning beds to achieve maximum tanning results on their legs.

I was so excited and impatiently awaited the latest model to be released, and when it finally arrived I was amazed! It looks so futuristic with changing illuminated lighting. And best of all, it opens up for easy cleaning of the acrylics while delivering great results." - Christina Kourbelas, Body Perfect Tanning

"All day long my staff asks clients, is there any part of your body not tanning as fast as you would like? And all day long we get the same response "my Legs."

If we didn't have The Leg Tanner we would literally be losing money every day. The Leg Tanner is great because you are fulfilling a need your tanning clients already have and wish they could remedy.

Going in the same beds more times day after day will never fix their problems only make their uneven tan worse. They are coming to see you so they can wear shorts and dresses, not have the DARKEST stomach in the city. - Shawn Tucker, Perfect Tan

Take Our Challenge

Ask the first 5 women who enter your salon if they want tan, beautiful legs using The Leg Tanner... then call us!
