SAFE AND EASY OPERATION

Maxter V19-ER: maximum results and minimum energy consumption with the new Evolution Reflectors. Maintenance and cleaning are easy and immediate. Safety is guaranteed by electronic monitoring for the absence of damage to filters, operating temperature and ventilation. In case of malfunctions the session is immediately halted, with a warning shown on the console display. The possibility of selecting different exposure times allows tanning sessions to be personalized.
MAXTER V19-ER, PERFECT TANNING

Maxter V19-ER: advanced technology, maximum efficiency, comfort, safety and a design with open styling, allowing users to float in a bath of light without suffering from high temperatures and the unpleasant sensation of claustrophobia produced by other types of tanning machines. Maxter V19-ER uses Evolution Reflectors to ensure more intense and uniform emissions and lower power consumption. The new DEC (Dynamic Energy Control) technology allows lamps to be controlled and monitored electronically, varying the UV emissions of the solarium.

POWER AND SAFETY

Maxter V19-ER has four panels with 19 high-pressure lamps and ER reflectors. Plexiglass screens prevent all possible contact between users and radiation sources, and guarantee maximum safety, together with special IS0 ITALIA devices to eliminate all risks. Technical solutions for enhanced safety include electronic monitoring of the absence of damage to filters, operating temperature and correct operation of the solarium ventilation system, with automatic halting of tanning sessions in case of malfunctions.

MAXTER, THE CLASSICS OF THE FUTURE

In the best traditions of IS0 ITALIA, the design and technology of the solariums of the Maxter line look towards the future, concentrating on maximum user satisfaction. The internal space, their open styling, electronic variation of airflow to the face and body and a stereo radio and MP3 players add even further to the comfort of this remarkable solar shower, which with its compact dimensions can easily be installed in a wide variety of beauty salons and tanning centres. Maxter V19-ER gives details on the number of sessions completed, the hours of operation and the right moment to change lamps. It can offer four different tanning programmes. The voice synthesis messages giving information on correct tanning can be personalized.

DESIGN, MINIMUM DIMENSIONS, HIGH PERFORMANCE

Matrix Compact L28-ER is a powerful blend of technology, design, safety, efficiency, low running costs and easy compatibility with all surroundings. Essential design with open styling, absolute safety and high efficiency for tanning sessions, superior comfort and extremely compact dimensions are outstanding features that make this solarium a benchmark for the entire sector. As on all I.SO ITALIA products, quality marks certify that the components used comply with exacting safety standards.
**TANNING IN MAXIMUM COMFORT**

28 high-pressure UV-A lamps, with 5 tanning units arranged radially around the user’s body – 6 lamps on each upper unit and 5 on each lower unit, plus an intense facial unit with 6 650 W lamps, ensuring tanning sessions that are not only shorter and more effective... but also significantly more comfortable, thanks to a powerful ventilation system that can be adjusted by the user, perfect soundproofing and a stereo system with headphones. Highly reliable electronic safety devices protect users against the consequences of any possible breakage or malfunction. The DEC (Dynamic Energy Control) system allows the high-pressure lamps to be controlled and monitored electronically.

**HYPERTECHNOLOGICAL TANNING**

Matrix is the most advanced tanning technology, the future of UVA, the tomorrow of tanning treatments. Absolutely innovative, reliable and practical. Matrix is the new series of solariums with circular action, revolutionizing tanning sessions and guaranteeing the best results in perfect relaxation. Details on the number of sessions completed, the hours of operation and the right moment to change lamps. It can offer four different tanning programmes. The voice synthesis messages giving information on correct tanning can be personalized.

V28-ER: BATHED IN SUNSHINE

Space, air and light: Matrix V28-ER is a vertical solarium designed around the body, offering an exceptional sensation of sunbathing. Its uniform emission from lamps arranged all round the body permits the perfect distribution of radiations, halving session times and fully respecting the skin. Matrix offers the most advanced technology for tanning, absolutely innovative, reliable and practical.
A MATRIX OF SUNSHINE, SAFE AND SMART

Matrix V28-ER is designed to give the maximum results with minimum power consumption, thanks to the new Evolution Reflectors, and also to make the maintenance and cleaning of all components even easier. Safety is guaranteed by electronic monitoring of absence of damage to filters, operating temperature and ventilation. In case of malfunctions the session is immediately halted, with a warning shown on the console display. The cabin is closed with a special mechanic catch that can be opened at any moment simply by pressing.

COMFORT AND RELAXATION, LIKE BEING ON THE BEACH

Monitored by an electronic system, ventilation on the Matrix V28-ER is powerful, silent and efficient. Surrounded by light, space, air and energy can be felt almost physically, with every part of the body bathed by the light of the enormous tanning power of this exceptional solarium. The spacious interior and the great distance between tanning units ensure unique sensations.

HYPERTECHNOLOGICAL TANNING

A simple command console allows users to set tanning time, to vary the desired amount of ventilation and to listen to their favourite music. Matrix V28-ER gives details on the number of sessions completed, the hours of operation and the right moment to change lamps. It can offer four different tanning programmes. The voice synthesizer messages giving information on correct tanning can be personalized.

Matrix Glammy L18-ER, with its compact dimensions and design that perfectly matches any surroundings, unites high technology with the safety, comfort and efficiency that characterize all ISIO Italia solariums. Glammy is certainly "glamorous", but at the same time versatile, young, casual and trendy, with a name that reflects all its versatile characteristics. The DEC version, with electronic power control, allows Glammy to move easily from softer sessions, for users preferring relaxation, to more dynamic services.
**CONCENTRATED QUALITY**

Despite its compact size, Glammy is an exceptional tanning bed, with a variety of technological features that make it one of the best performing professional machines. With 18 UV-A lamps, Matrix Glammy L18-ER has 3 large tanning units, each comprising 6 high-pressure lamps with ER reflectors, giving powerful emissions with minimum power consumption. Two of the tanning units are located on the upper part of the solarium, and can be positioned manually. The third tanning unit is beneath the plexiglas user support surface, offering a slow but continuous tilting movement that guarantees perfect diffusion of emissions and avoids areas of excessive heat accumulation.

**360° EFFICIENCY, COMFORT AND SAFETY**

The tanning units surround the user perfectly, without producing sensations of claustrophobia, thanks to the great distance between the units. Ventilation for the face and body is located in the upper part of the solarium, and a robust plexiglas ledge cooled from below with a forced ventilation system ensures users perfect all-round tanning. The UV filters have a patented electronic circuit that can detect and warn of any filter breakages on the anti-reflection liquid-crystal display, also halting the session.

**HYPERTECHNOLOGICAL TANNING**

Matrix is the most advanced tanning technology, the future of UVA, the tomorrow of tanning treatments. **MAXTER L18-ER**

- Anti-reflection liquid-crystal display prearranged for Internet connection and remote monitoring
- Button to select one of 4 exposure times for skin phototype of user
- Emergency button
- Stereo radio complete with speakers and headphones with MP3 player
- Electronic monitoring of possible filter breakages
- Electronic monitoring of solarium operating temperature
- Electronic monitoring of correct functioning of solarium ventilation
- Electronic variation of airflow to face and body
- Manual positioning of tanning unit
- Button to select body section, face or both
- Voice synthesizer with messages for start, middle and end of session
- Digital timer and unit counter plus
- Mechanical timer
- Hot air expulsion with 1 flexible hose, diameter 25 cm, length 3 metres

**OPTIONAL**

- Aroma diffuser
- Air deflector
- Digital remote control
- External roll holder
- Electronic token unit

L33-ER: THE SUN AROUND YOU

Thirty-three high-pressure UVA lamps for a uniform and simultaneous all-round effect over the whole body, without the user needing to turn over. With its emission in all directions and the lifting effect of the central tanning units, Matrix L33-ER ensures all-round body tanning while cutting session times by 50%. A simple command console allows users to set tanning time, to vary the desired amount of ventilation and to listen to their favourite music.
INTELLIGENT AND SAFE DESIGN
Matrix L33-ER is a smart system that simplifies maintenance and cleaning. Filters and lamps are reached just by lifting and removing the plexiglas panels. The air filters for lamp cooling are easily accessible. Electronic circuits halt the tanning session in case of high temperatures and give warning messages on the liquid-crystal display for any malfunctions of UV filters, stopping the machines in the presence of even the slightest breakage. Matrix L33-ER ensures maximum efficiency with minimum power consumption, thanks to special ER reflectors.

TOTAL RELAXATION
With a perfect blend of advanced design and technological solutions, Matrix L33-ER offers absolutely uniform and complete tanning sessions that are also totally enjoyable. Comfort is enhanced by the solarium’s open styling, giving the extraordinary sensation of being quite simply surrounded by light. The ventilation system installed on Matrix L33-ER, powerful, silent and highly efficient, is controlled by an electronic system, and an optional kit can be used to connect it directly to an air conditioning system.

TECHNOLOGY
Absolutely innovative, reliable and practical, Matrix is the new series of solariums with circular action, revolutionizing tanning sessions and guaranteeing the best results in perfect relaxation. A power regulator to increase or decrease solarium radiation can be fitted. Matrix L33-ER gives details on the number of sessions completed, the hours of operation and the right moment to change lamps. It can offer four different tanning programmes.

I.SO ITALIA, ALWAYS A LEADER

A highly effective sales strategy backed by a manufacturing philosophy that gives priority to the absolute safety and functionality of products have enabled I.SO ITALIA to occupy a leading position on both Italian and foreign markets, and the group now exports to many European, Asian and American countries. I.SO ITALIA has expanded its success from the mid-1990’s through to the present-day with a constantly updated range of products designed to cater for all the latest market demands.

I.SO Italia quality
Confident in the quality of its products, all with the mark, I.SO Italia is undergoing the trials and test procedures necessary for granting of the TUV Mark. I.SO Italia technology guarantees safety, excellent operation, savings, and efficiency to further enhance the professionalism and image of tanning centres.
One of Iso Italia’s strongest points is its capacity to satisfy all needs of its customers promptly and with effective and reliable solutions. An ample range of lamps, filters and electronic parts, fitted onsite by expert technicians following strict procedures for registering all servicing operations to ensure a comprehensive overview of the history of every machine.

The entire Iso Italia assistance network has equipment to check the emission of tanning machines to ensure compliance with applicable standards.

**Optimal yield, minimum energy use:**

**ER REFLECTORS**

Our exclusive Evolution Reflectors make tanning sessions even more comfortable, increasing the efficiency of UV emissions and reducing energy consumption.

**A problem solved: SAFETY FILTERS**

The screen-printed filters, with electrical contacts applied during printing, are automatically monitored for possible damage, halting sessions in case of even the slightest breakages that might compromise safe use.

**All in a single display: THE NEW ELECTRONIC SYSTEM AND ON-LINE MONITORING**

Iso Italia has equipped all its new tanning machines with new command systems for electronic solarium control, an absolute technological innovation in the sector, that guarantees: check for absence of damage on every single filter, memory to record any malfunctions, second safety timer, selection of solarium section (face, body) to be used, monitoring system for power supply to lamp ventilation, menu system for programming all machine parameters with separate access password for operator and technical assistance.

**ON-LINE MONITORING**

Possibility of Internet connection for online function checks and technical assistance in case of malfunctions not requiring replacement of parts.

**Always maximum yield:**

**ELECTRONIC STARTING**

The DEC electronic starting system for high-pressure lamps, patented by Iso Italia, is a safe and functional solution for modern solarium operation. It makes possible the best personalisation of the tanning session, and less technical maintenance. The system complies with all applicable legal standards.

**Flexibility and technology:**

**THE POWER REGULATOR**

Power variation, based on electronic switching of reactor outputs, is possible both before and after the start of sessions. Four power levels can be selected, up to a maximum reduction of around 40%. A special feature of the system is the self-diagnosis function performed by the power regulation circuits every time they are switched on, guaranteeing correct operation during sessions.

Iso Italia technology means efficiency and safety for tanning sessions.
